PROFILE

Full Stack MERN grad, experienced in MongoDB, SQL, Express.js, React.js, Node.js. Skilled in clean coding, bug fixing, and RESTful API design.
Collaborative, user-friendly interface developer with a focus on automating processes. Ready to contribute technical expertise to dynamic software Teams.

EXPERIENCE

- **Software Developer** – *Digital-Sync*
- Working on microservices and API handling, ensuring smooth communication between frontend and backend systems.
- Contributing to the development of scalable and efficient software solutions to meet business objectives.
- **Web Developer (Internship)** *Achintya Solution - 6 Months*
- Worked on real-time projects, gained hands-on experience in web development.
- Learned and implemented various web technologies while contributing to the development of projects available on Google.

Digital-Sync March - 2024

- **Project:** The **Omni Edgemetic Platform** is a real-time data analytics solution built with **Next.js** and **Edgemetic Tool** to process readings from edge devices. It offers seamless API integration and fast, responsive performance, making it ideal for real-time monitoring and edge computing. This platform ensures efficient data processing and instant insights from connected devices.
- **Role:** As the lead developer, orchestrated architecture design, frontend implementation, and backend integration, ensuring alignment with business objectives.
- **Key Learnings:** Deepened expertise in Next.js, Tailwind CSS, and microservices architecture, enhancing technical proficiency. Refined project management skills through overseeing all stages of development, from conception to deployment.

Chat Web app

- Created a chat website with frontend and backend development using React JS, Node.js, and MongoDB.
- •. Integrated Micro script for real-time messaging Link: - Chat app (gossamer-foregoing-megaraptor.glitch.me)
